Your engine harness is wired for an internal coiled distributor. Plug everything in as it should without worrying about any wiring. For 92-93 accords, your harness is wired for an externally coiled distributor. This creates an issue because the JDM F22B DOHC comes with an internally coiled distributor. You have a few options; space 1.

I used PCB, and my understanding is you just plug the PCB ECU into the rywire custom conversion harness, and then you plug the conversion harness into the ECU harness for the obd2a ECU. Beyond that, the guy who did the wiring for me said any questions and he just called rywire and they were able to help him out. No added wires as far as I know.
