Fascia: The Tensional Network of the Human Body ...
A fascia is a band or sheet of connective tissue, primarily collagen, beneath the skin that attaches, stabilizes, encloses, and separates muscles and other internal organs. Fascia is classified by layer, as superficial fascia, deep fascia, and visceral or parietal fascia, or by its function and anatomical location. Like ligaments, aponeuroses, and tendons, fascia is made up of fibrous connective tissue containing closely packed bundles of collagen fibers oriented in a wavy pattern parallel to th

Fascia: The Tensional Network of the Human Body : Ph. D ...
1. Fascia should no longer be thought of as a simple supporting structure, but rather, now encompasses many types of connective tissue, many of which form a tensional network throughout the body; in which multiple structures are truly inextricably linked. 2. There is a rich proximity of sympathetic nerve fibers. 3.
