## **Fiber Optic Reference Guide**

Fiber-optic communication is a method of transmitting information from one place to another by sending pulses of infrared light through an optical fiber. The light is a form of carrier wave that is modulated to carry

## Get Free Fiber Optic Reference Guide

information. Fiber is preferred over electrical cabling when high bandwidth, long distance, or immunity to electromagnetic interference is required.

### **Fiber-optic communication - Wikipedia**

## Get Free Fiber Optic Reference Guide

A fiber-optic cable, also known as an optical-fiber cable, is an assembly similar to an electrical cable, but containing one or more optical fibers that are used to carry light. The optical fiber elements are typically individually coated with plastic layers and

## Get Free Fiber Optic Reference Guide

contained in a protective tube suitable for the environment where the cable is used.
