SJR : Scientific Journal Rankings

Layer-by-layer assembled films using reversible/dynamic bonds between the polymer pairs as driving forces are dynamic in nature. They may disintegrate under certain conditions as a result of the breakage of the dynamic bonds. More importantly they disintegrate gradually under conditions of equilibrium contro

Journal de France 2012, directed by Raymond Depardon and ...

Wrinkling modes are determined for a two-layer system comprised of a neo-Hookean film bonded to an infinitely deep neo-Hookean substrate with the entire bilayer undergoing compression. The full range of the film/substrate modulus ratio is considered from the limit of a traction-free homogeneous substrate to very stiff films on compliant substrates.

Cinema Journal on JSTOR

Hematite (Fe₂O₃) thin films with different thicknesses are fabricated by the rf magnetron sputtering deposition. The effects of film thicknesses on the photocatalytic activity of hematite films have been investigated. Hematite films possess a polycrystalline hexagonal structure, and the band gap decreases with an increase of film thickness.
