Financial Econometrics, by Oliver Linton of Cambridge University, is written for master's degree students in finance and focuses on extending the path-breaking work presented in The Econometrics of Financial Markets by John Y. Campbell, Andrew W. Lo, and A. Craig MacKinlay (CLM). This is an ambitious and worthy goal, and Professor Linton provides a good reference work for key financial ...

Financial Economics Definition

Financial economics is the branch of economics characterized by a "concentration on monetary activities", in which "money of one type or another is likely to appear on both sides of a trade". Its concern is thus the interrelation of financial variables, such as prices, interest rates and shares, as opposed to those concerning the real economy.
