### Fluid Restriction Guide

Fluid restriction means that you need to limit the amount of liquid you have each day. Fluid restriction is needed if your body is holding water. This is called fluid retention. Fluid retention can cause health problems, such as tissue and blood vessel damage, long-term swelling, and stress on the heart.

### Liquids Rule | Transportation Security Administration

Living with chronic kidney disease can come with many challenges. For some, these challenges include navigating fluid restrictions. Not every kidney disease patient has to restrict their fluid intake, but many who are reaching end-stage renal disease will have to monitor and restrict the amount of fluid they put into their body.

### Controlling fluid intake in heart failure

Liquids Rule. You are allowed to bring a quart-sized bag of liquids, aerosols, gels, creams and pastes in your carry-on bag and through the checkpoint. These are limited to travel-sized containers that are 3.4 ounces (100 milliliters) or less per item. Placing these items in the small bag and separating from your carry-on baggage facilitates ...
