existed for decades in many forms and practices. Originally referred to as Advanced Quality Planning (AQP), APQP is used by progressive companies to assure quality and performance through planning.

What is APQP?

General Motors, Ford, and Chrysler all had an APQP deployment and saw the need to come together to create a common core of product quality-planning principles for suppliers. Because supply chains are important in automotive manufacturing, the intent was to make sure supplier partners met customer quality requirements for each component supplied.
