Manual of Poultry Diseases Free PDF. Poultry is the predominant type of animal production in both developed and developing countries. While poultry production has expanded significantly in recent decades, particularly in Asia, since late 2003 growth has been curbed worldwide by the spread of avian influenza.

Histomoniasis is a commercially significant disease of poultry, particularly of chickens and turkeys, due to parasitic infection of a protozoan, *Histomonas meleagridis*. The protozoan is transmitted to the bird by the nematode parasite *Heterakis gallinarum*. *H. meleagridis* resides within the eggs of *H. gallinarum*, so birds ingest the parasites along with contaminated soil or food.
