This may seem a little different, but it actually comes up a lot. First, we must write the volume in terms of x . The volume of a pyramid is one third of the area of the base times by the perpendicular height. We know the area of the base is 18 cm^2 , and the expression we're given for the height is $x+5$, so the volume is

$$\frac{1}{3} \times 18 \times (x+5) = 6(x+5)$$
