The gas furnace circuit board mounted fuse. Fuses part 2  
I have Inter-City Products natural gas furnace with a W/R 50A50-112 Total Furnace Control which has an intermittent problem. Most heating cycles operate OK but, for about one in six times, the furnace blower fan remains operating after the burner is off and the heat exchanger has returned to room temperature. At these times the red control LED diagnostic indicator light remains on continuously.
