V Homework Help - Geologic Time Scale worksheet answer key (1) from GLG 103 at Rio Salado Community College.

Earth science astronomy unit review worksheet answer key

Creation and Geologic Layers. In one day, our infinitely wise, all-powerful Creator laid down some dirt layers 30 miles thick that are now deep in the geologic record and foundational to the landmasses on. These provide us with an abundance of resources, which we use to worship and serve Him for His purposes and glory.

Paleontology is the study of the history of life on Earth as based on fossils. Fossils are the remains of plants, animals, fungi, bacteria, and single-celled living things that have been replaced by rock impressions of organisms preserved in rock. Paleontologists use fossil remains to understand different aspects of extinct and living organisms.
