work in geomorphology often seems to be sacrificing breadth of vision for focus on details. In both ap proaches it is a common trend for workers to be in creasingly critical of operating within general frame works of thought, particularly with the examples of the Davis and Penck geomorphic systems before them, and ...

Physical Geography - John Abbott College

What is Geomorphology? Geomorphology is the study of landforms, i.e. the shape of the Earths surface. It attempts to explain why landscapes look as they do in terms of the structures, materials, processes, and history affecting regions. Geomorphology relates to all the other disciplines of geology in two directions ; Tectonics, petrology, geochemistry, stratigraphy,
