Timeline of Irish inventions and discoveries - Wikipedia

In mathematics, physics, and engineering, spatial frequency is a characteristic of any structure that is periodic across position in space. The spatial frequency is a measure of how often sinusoidal components (as determined by the Fourier transform) of the structure repeat per unit of distance. The SI unit of spatial frequency is cycles per m. In image-processing applications, spatial frequency ...

In some fields, such as medicine and physics, an article may have hundreds of authors, in such cases it may be impractical to list each one. You would reference as follows: In the text. For an in-text citation within your work for three or more authors, you would use the surname of the first author followed by "et al." in all citations
