Greek and Roman Architecture - D. S. Robertson, Robertson ...

Ancient Roman architecture mainly drew its influence from Greek and Etruscan architecture, and also a little from Egyptian and Persian architecture. For example, it learned the use of hydraulics from the Etruscans, incorporated the obelisk from Egypt in various structures, and even used designs from different regions for the construction of Emperor Hadrian's Villa.

Roman Architecture - Ancient History Encyclopedia

Ancient Roman architecture adopted the external language of classical Greek architecture for the purposes of the ancient Romans, but was different from Greek buildings, becoming a new architectural style. The two styles are often considered one body of classical architecture. Roman architecture flourished in the Roman Republic and even more so under the Empire, when the great majority of surviving buildings were constructed. It used new materials, particularly concrete, and newer technologies su
