Guide number - Wikipedia

How do you use a flash guide number? Finding the maximum distance for your flash when changing aperture. Changing ISO. Bumping up your ISO will make your sensor more sensitive to light,... Reducing flash power. Sometimes we need to reduce the flash power to have faster cycling times,... Final ...

Strobist: Guide Number: Your Free Flash Meter

Guide Number simply is the multiplied product of (flash distance x f/stop) for a proper exposure situation (normally specified for ISO 100). For example, if a certain Guide Number were equal to 100 (feet), then it says a correct direct flash exposure is f/20 at 5 feet, or f/5 at 20 feet, or f/10 at 10 feet, etc.

Guide Numbers Explained for Manual Flash - Calculator ...

File Type PDF Guide Number Flash

If the flash unit has a guide number of 12 at ISO 100 and aperture is set to f/4, the subject can be up to 3 m away. If the subject is more than 3 m distant, the flash will not be bright enough to light the subject and the photograph will be underexposed.

Flash Level (Guide Number) - Nikon | Imaging Products

Guide Number: 197? (60 m) at ISO 100 ... for the flash-head zoomed to 200mm Guide Number: 118? (36 m) at ISO 100 ... for the flash-head zoomed to 35mm The GN of 118 is close enough to the Nikon's that the explanation is the same for 35mm flash-head zoom.

Canon U.S.A., Inc. | Speedlite 600EX-RT

Lighting System (CLS) with a guide number of 34/48 (ISO 100/200, m) (111.5/157.5, ft) (at the 35 mm zoom head position in Nikon F format with standard illumination pattern, 20 °C/68 °F).

Demystifying Flash Guide Numbers - Vivid Light

1. Guide number: different types have different outputs and ranges which is of importance. Generally, GN24 is enough. The bigger the guide number is, the higher the flash power is and the remoter the shooting range is. Users can choose it according to their need. 2.

10 Things to Know Before Buying a Camera Flash

Specifically, a flash unit's guide number indicates how much light the unit will emit in relation to a standard film speed. The higher the guide number, the more powerful the flash. This number is usually indicated in the owner's manual of the flash. It's represented as "GN 118 with ISO 100 film."

Flash Photography - Understanding Guide Numbers

The guide number of a flash is the product of the f/stop of the exposure at a given distance at ISO 100. Wikipedia has a whole page on it here. But that's all pretty math-centered and kinda inverse-squarish. And you really do not need to know that stuff to use GN to zero in on a first exposure.

Guide Number Flash

Flash Guide Number Distance, Aperture and ISO. In order to understand how a flash guide number is calculated,... A Balanced Exposure. Ideally, you'd like to capture photos that look like #3 all... Flash Guide Number Formula. Before we dig into some examples, it's important to note... Guide Number ...

Tutorial: How to use the guide number of your flash

Generally, flashes which have a higher guide number would yield the stronger flasher output. In regards to the zoom range, one

File Type PDF Guide Number Flash

flash might have coverage from 24-200mm on a full frame camera, while another would only cover 18-105mm on a APS-C camera. This can vary depending on how the manufacturer conducted their test.

A Guide to On-Camera Flash | B&H Explora

A guide number is just that, a guide, and you won't likely find it on your flash anywhere. We look at what a guide number is, what it means, how to figure it out, and how to use it to help...

Flash Guide Number - The Digital SLR Guide

Guide Number is a numerical method used to determine exposure of direct flash for Manual flash power levels, to automatically deal with the Inverse Square Law, making the math be trivial. The reference base is a known accurate Guide Number for one situation, from which other situations can be calculated.

What is a Flash Guide Number?

$f\text{-stop} = \text{guide number} / \text{flash-to-subject distance}$ So at ISO 100, a flash of guide number 12 meters or 39 feet, when used 10 feet from the subject, calls for $f/3.9$; and a flash of guide number 26 meters or 85 feet, when used 10 feet from the subject, calls for $f/8.5$.

The magnitude of guide numbers is a function of the following four variables: The total luminous energy (in lumen*seconds) emitted by the flash head... The solid angle subtended by the circular- or rectangular-profile beam as it leaves the flash head... The ISO sensitivity setting. Filters ...

Flash guide number comparisons | Photo.net Photography Forums

Understanding Guide Numbers – The guide number can help you calculate the range of a specific flash by dividing the guide number by the $f\text{/stop}$ you plan on using. $\text{flash-to-subject distance} = \text{guide number} / f\text{-stop}$ For example, the Nikon SB-910 used in the video has a guide number of 34 meters.

Compare Power Rating of Camera Flashes with Guide Numbers

Guide numbers are the standardized, numerical way of determining the power of a flash, with a higher guide number representing a more powerful flash. A guide number is the product of multiplying the $f\text{/stop}$ of an exposure with a given distance, at ISO 100; or $\text{GN} = f\text{/number} \times \text{distance}$.

Understanding Guide Numbers | B&H Explora

A flash's power is determined by its Guide Number, with low Guide Numbers (GN) indicating a weak or less powerful flash than one with a high GN. For ease of comparison, most flash GNs are rated for an ISO 100 film. If you use a film with a lower ISO the GN

File Type PDF Guide Number Flash

will be lower, and, conversely, if you use a higher speed film the GN will be higher.
