Handbook of Central Auditory Processing Disorder: Auditory ...

Auditory processing disorder, rarely known as King-Kopetzky syndrome or auditory disability with normal hearing, is an umbrella term for a variety of disorders that affect the way the brain processes auditory information. Individuals with APD usually have normal structure and function of the outer, middle, and inner ear. However, they cannot process the information they hear in the same way as others do, which leads to difficulties in recognizing and interpreting sounds, especially the sounds co
