/EXPL THER/: Two studies have been identified concerning the use of 1,4-butanediol as a sedative. The favorable sedative effect of 4-hydroxybutyric acid-sodium in the treatment of intensive-care patients had the disadvantage that the patients were given too much sodium (1g sodium hydroxybutyrate is equivalent to 180 mg sodium). Attempts were therefore made to use the parent compound, 1,4 ...

Ketamine - Wikipedia

Dopamine (DA, a contraction of 3,4-dihydroxyphenethylamine) is a neurotransmitter that plays several important roles in the brain and body. It is an organic chemical of the catecholamine and phenethylamine families. Dopamine constitutes about 80% of the catecholamine content in the brain. It is an amine synthesized by removing a carboxyl group from a molecule of its precursor chemical, L-DOPA ...
