1 Answer. Re: Hino code P141f. Catalyst Temperature Sensor 1/2 Correlation, Bank 2. Basically sensor 1 and sensor 2 are not in range of each other. Needs to go on a scanner to see the read out f temperatures. Most likely on of the sensors died or came out of the exhaust.

SOLVED: What is code p141f on a 2013 hino 258 - Fixya

P141F is for the DPF system. Remove the injector and inspect it. Most likely the tip will be damaged and overfueling which is common. Replace the injector. Also I recommend servicing and cleaning the DPF system and then try a successful regeneration to see if it will complete without throwing any codes.

SERVICE MANUAL

The cost of diagnosing the P2030 code is 1.0 hour of labor. The auto repair labor rates vary widely across the country, and even within the same city. Most auto repairs shops charge between \$75 and \$150 per hour.
