Getting these four elements right is crucial for an immersing movie experience, regardless of the area of the house you are transforming into a home theater.

Wiring Diagrams for your Entertainment System

Usually, using a 16-gauge wire is recommended for most home theater applications. However, if the wiring network for your home theater requires more than 50 feet of wire or if you want to set up in-wall or ceiling speakers, you may need to use a thicker wire (preferably 14 or 12-gauge) because long cable runs can cause considerable power losses.

In-wall Wiring Guide for Home A/V

All-in-one home theater systems, also known as home-theater-in-a box (HTIB), offer surprising performance capabilities. But you'll need to make the right connections to get the most out of your system. □ Some newer HTIBs feature the digital HDMI connection for video signals. If yours does, and if your TV can accept it, this is the connection ...
