COMMERCIAL FRUIT PRODUCTION IN ETHIOPIA

Agriculture in Ethiopia is the foundation of the country's economy, accounting for half of gross domestic product (GDP), 83.9% of exports, and 80% of total employment.. Ethiopia's agriculture is plagued by periodic drought, soil degradation caused by overgrazing, deforestation, high levels of taxation and poor infrastructure (making it difficult and expensive to get goods to market).

Horticulture faces many challenges competitiveness. The growth in horticultural industries in some African countries, such as Kenya, has therefore become very significant (Table 3). A very notable example of a shift in the production of a specific crop is the expansion of apple production from China. The Table 3. Main horticultural exports* from Kenya (from EPZA, 2005).
