3. Remove the existing key and, within 15 seconds, insert the new key and turn it to ON (RUN). 4. The security light will light up for two seconds to indicate success in programming the key into the vehicle. 5. Don't attempt to start the vehicle with any key for at least 1 minute. ON-BOARD PROGRAMMING METHOD "C"

Disable PATS and replace ECU without reprogramming?

The PATS system is more then capable for the every day morons. If you disable PATS a 16 year old and a screwdriver can take you car for a spin. The people smart enough to disable the PATS system dont want our cars they want fancier cars. The days of people reaching under the dash for a handful of wires to steal a car are long gone.

Disabling PATS - Ford Truck Enthusiasts Forums

Engine stalls on road: Once the engine runs for one second, PATS CANNOT disable the engine. Running stalls are not PATS related issues. Remote Entry/Keyless Entry problems: PATS is completely separate from the Remote Entry/Keyless Entry systems. There is a no-crank problem on

vehicles without PATS Starter disable.

How To Disable Pats On
How to disable PATS. The damage that can be done is probably more costly than a key. For remote start you would need a key with the chip in it for bypass relay. Whether you buy the relay or create one using thin wire wrapped around the key and a separate relay, you still need a key. It sucks but its just how its made.
