Why is My Air Conditioner

Download Free How To Fix Air Conditioner Installation Guide

Leaking and How to Fix It
When a central air conditioner is operating, hot air inside the house flows to the furnace through the return-air duct. The hot air is moved by the blower across the cooled evaporator coil in the plenum and is then delivered through ducts to cool the house. When the air conditioner works but the house doesn't cool, the problem is probably in the distribution system.
