How to Identify Trends and Trading Ranges - dummies

In recent times the market has been trading sideways and caught ranging in a lot of Forex pairs, so this is a perfect time to write a trading lesson on how to trade price action in a sideways trading market to help traders on how they should approach these types of markets and how they can get the highest probability trades out of ranging and sideways moving markets.

How to build a winning range-bound trading strategy

How to Trade Ranges. The only other real requirement for a range is that price action needs to be bound between support and resistance, giving the trader the idea that if previously established support and resistance remain respected, the trader may be able to see a profitable position.

Trading Range Definition

To effectively trade a range-bound stock, it is essential to first confirm the range. This means the price should have reached at least two similar highs and lows without breaking above or below at any point in between. Once the range, or price channel, is established,...

How Average True Range (ATR) Can Improve Your Trading

The average trading range is the average distance between the high and the low over a specified period of time. You can calculate the average high-low range on a piece of paper, a spreadsheet, or by using charting software. The average trading range is one of the best tools you have for keeping your sanity and perspective.

The 3 Step Range Trading Strategy

How to identify a trading range. Time Warner spent more than nine months trading between \$13.50 and \$16.50. Notice how the price moves up and down but always between those levels, never making much progress one way or the other. Also notice the lines drawn on the chart near \$13.50 and \$16.50. These lines show support and resistance levels, respectively.
