Hp User Manuals Download - ManualsLib  
The HP 48 series of calculators support a stack-based programming language named RPL, a supposed combination of Reverse Polish notation (RPN) and Lisp. RPL adds the concepts of lists and functions to stack -based programming, allowing the programmer to pass unevaluated code as arguments to functions, or return unevaluated code from a function by leaving it on the stack.

HP-48S/SX - HP calculators  
The HP48 series was the top of the HP range from 1990 until the introduction of the HP49 in 1999. The range consists of the HP48S, HP48SX, HP48G, HP48G+, HP48GX and HP48GII. The GII model is still available and all models are well supported by HPCC members as well as the internet community as a whole (see the links section below).

HP 48 Civil Engineering and Surveying Applications  
The HP-48S/SX had a large 64 x 131 pixel display. It typically showed the current directory at the top, followed by four lines of the stack. At the bottom was a row of labels for the top row of soft keys. The large screen made plotting as well as features like the Equation Writer and the Matrix Writer more useful.
