(PDF) Aggression - ResearchGate

It has been reported that rage syndrome was

found to be more common in red, golden/blonde or black cockers than in any other colour and specific lines tend to have a higher occurrence. All solid coloured cockers tend to be at higher risk than their multi-coloured counterparts, with darker colours being most affected.

Effects of Alcohol on Human Aggression | SpringerLink

'Springer Rage' is thought to occur when a Springer Spaniel has entered an altered state of consciousness (genetic) which may lead to strange behavior. However, as we will discuss below some experts feel that it is due to

dominance aggression more common in Springer Spaniels.

Culture and Brain | Home - Springer

In sibling adoption studies, the correlation between adoptive siblings is compared with the correlation between biological siblings to estimate the influence of genetic and environmental factors on aggressive behavior (Plomin et al., 2001). Resemblance between adoptive siblings for measures of aggression is indicative of shared (or common) family environment, while the extent to which ...

Social Determinants of Aggression | SpringerLink

Rage syndrome is a rare pathological aggression that can be seen in several breeds and mixed-breed dogs. It does not occur at a high frequency in Springer Spaniels and its mention unfairly stigmatizes the breed.

Human Aggression | Robert A. Baron | Springer
These have been extremely varied in scope, including, among many others, such diverse topics as the effects of sexual arousal upon aggression, the impact of environmental factors (e. g. , heat, noise, crowding) upon such

behavior, interracial aggression, and the influence of heightened self-awareness.

Definition. Although definitions of aggression vary, most researchers agree that aggressive acts are both intentional and potentially hurtful to the victim. Thus, learned aggression in humans is defined as learned (not instinctive) behavior or actions that are meant to harm another individual.

***Journal of Technology in Behavioral Science |
Home - Springer***

Unlike other training methods, our Training Course portrays aggression as a mental state that your English Springer Spaniel exhibits rather than a problem that you have to solve. It

has everything you need to know to appreciate its emotions (fear, threat, discomfort etc.) and stop it from behaving aggressively toward people or other animals.
