**Castration Band Challenge - Darwin Awards - YouTube**

Description: Since at least the 1950s men have been the rod of life and women have been the vessel. This incredible retard procedure reverses that tradition and plays on every man and woman's love of the miracle of birth. Science has not yet devised a way to implant a human fetus into a man, but nature has provided every man with a happy home for incubating chicks.

**Human male castration procedures - eHow**

The practice survived the Christianisation of the Roman Empire: one of the early Church fathers, Origen, is famous for committing self-castration. Castration continued in Byzantium (where gelded boys were trained as choristers) and into the 20th-century Russian Orthodox church, where the skoptsy sect encouraged self-castration as late as the 1920s.

The band is then stretched by a ratchet and a metal clip fitted near the scrotum. A blade is then triggered to cut the unclipped part of the band. The result is that the clipped band fits incredibly tightly, squeezing the scrotum and the cords and shutting off the blood supply to the nuts. The scrotum and nuts then die and drop off.

An elastrator is a castration device that cuts off circulation to the testicles when utilized, called "elastration." An elastrator basically stretches a strong rubber band over the scrotum and above the testicles. When the band is secured, the testicles are tightly tied off at the base of the scrotum and allowed to die from lack of blood.This process can take up to six or more hours, but in ...
