ZF Hurth Transmission Problem - Maintenance, Tech Info ...

ZF - HURTH transmission in my 346 Carver - knocking sound when idling in gear, at 1200 rpms - quiet - at 3000 rpms same sound and motor starts to lose power. My question is could the transmission be causing the loss of power to the engine or do I have 2 problems. I was told by a mechanic the loss of power was probably the fuel pump.

ZF Marine Transmissions, ZF Hurth Marine Transmissions ...

ZF/Hurth Transmissions ZF Hurth is a worldwide leader in marine propulsion systems, supplying systems and components for all types of vessels, such as motor boats, sailboats, superyachts as well as commercial and government vessels.

Hurth Transmission problem | Sailboat Owners Forums

A problem with my ZF Hurth this weeend almost lead to a bigger problem. On the last run of the day I noticed a delay when shifting into reverse. The throttle would rise before it would shift into reverse. I figured the linkage had slipped a little bit, as Ive had to adjust the linage in the past....

Transmission Troubles Part 1

We're in the final stages of purchasing a '93 Bayliner 3288. 351 Fords with Hurth transmissions. We were out for sea trials today, and there are some transmission noises that concern me. The engines were brought up to operating temperature at the dock before heading out. When put into gear, both transmissions had quite a pronounced rattle.

HELP - Hurth transmission problem! - Ericson Yachts

Hello from the Broughtons! I have had a tranny problem arise and would appreciate any suggestions and thoughts:The Hurth HBW 10 (or maybe it is a 5), starts making a grinding sound above 1800 rpm's (usually run the 5432 @ 2275) - the sound is kinda like when a standard auto tranny shift is missed.

Hurth Transmission Noises? | Boat Design Net

The damper plate is the likely cause of the annoying gear clatter on the ZF Hurth transmission, especially at idle power, on the Catalina 34 and 36, and other sailboats.

HELP - Hurth transmission problem! | EY.o Information Exchange

The engine runs fine and I think the clattering/vibrating noises I heard were just the result of the engine being run at a higher rpm without load once the transmission failed. The transmission is a Hurth HBW-50 2:1 mounted on a Universal M-20 engine. Looking forward to your responses - Thanks!

Two C's 1990 3888 MY ... the back of the engine because the motor mounts bolt to part of the flywheel cover that has to come off. Then, for the transmission ...

ZF Hurth Damper Clatter

None of this applies to a marine transmission, which is one reason why most mechanics refer to it not as a transmission but as a marine gear. First of all, slip is built into the marine system; there is no positive physical link between your propellers and the water such as there is between your tires and the pavement.
