Aspen Hysys Dynamics Process Control | Process Control ...
Process control for process engineers using dynamic simulation Process Engineers are heavy users of simulation tools (HYSYS, UniSim, A+, ...) to design new processes or revamps. They mainly work in steady-state mode, but frequently they have to interact with the Control Engineers to discuss how the process will be controlled and operated.

Process Dynamics Consider the simple "bath tub" example • Steady-

state: $F_i = F_o$ • Dynamic: $dV/dt = F_i - F_o$ where $V=V_{init}$ @ $t=0$
 $V=H \cdot A \cdot F_o = k \cdot H$ • Dynamic simulation predicts how a process and its associated control system will respond to various disturbances as a function of time • Usage has been increasing • Better tools
