beaks are most efficient for given foods by experimenting with imitation beaks and given food sources. 3.) Learn the importance of multiple trials. 4.) Represent their data with a bar graph.

identifying adaptations in birds answer key - Bing
Identifying Adaptations in Birds Lab Background Birds have many adaptations for flight. Hollow bones make birds light. Their feather-covered bodies are streamlined, which reduces air resistance. Strong flight muscles move the wings, and the wings provide aerodynamic lift. Birds are also adapted to their food source and to their environment.
