IBM ILE RPG Example of QCAPCMD API

A. You’re probably comfortable coding a prototype and procedure interface for a subprocedure. But you can also use PR/PI definitions to replace the *ENTRY PLIST for an RPG IV program When coding a procedure interface for a main procedure (i.e., a program), you must remember a few additional requirements:

IBM RPG - Wikipedia

In ILE RPG, the %ADDR built-in function is used for getting the address of a pointer. From an ILE programming model point of view, variable fields are referenced for processing data. So a variable’s pointer value is needed when coding a pointer operation. Figure 4 shows you how to use this built-in-function.
