Why do some journals lose their impact factor (IF)?

Many SRP scientists have published their findings in "high-impact journals" - those considered to be highly influential in their fields. A journal's impact factor is a measure of the frequency with which an average article in a journal has been cited in a particular year.

The Scientific World Journal - Wikipedia

Journal description. Alongside the current dramatic scientific progress in the life and environmental sciences, similar advances are occurring in the generation, distribution and management of scientific information. Critical to these advances are innovative methods of publishing that meet today's needs of authors, readers and their organizations.
