Inner Vision: An Exploration of Art and the Brain ...

Inner Vision is the first systematic attempt to explain visual art in terms of science. Without biological foundations, the author believes, theories of aesthetics cannot be complete, much less profound. It is a tantalizing claim and leads to a stimulating volume, variously provocative and compelling.

Inner Vision: An Exploration of Art and the Brain - Sémir ...

In Inner Vision, Zeki is less concerned with what neurophysiology can tell us about art than what art can tell us about neurophysiology. Painters have always been dependent on the functional organization of the visual brain, without being aware of that dependence. The portrait painter, Zeki points out, relies on the specialized areas in
