or Reciprocal Kernel:

The solution of the integral equation $y(x) = f(x) + \int_a^b K(x,t)y(t)dt$ is of the form $y(x) = f(x) + \int_a^b R(x,t; \lambda) f(t)dt$. The kernel $R(x,t; \lambda)$ of the solution is called resolvent or reciprocal kernel.
