MaxxForce Aftertreatment - Navistar Education

This running test for injection control pressure (ICP) is a good test to run since these specs determine the fuel injection operation. This is the DT MaxxForce which requires 870 psi of ICP to run while the maximum can go as high as 4500 psi. These high pressures create problems if there is a leak in the high pressure manifold or anything else related in the system.

International Maxxforce Engine Oil Pressure Sensor Location
