How to find the solution for a system of equations - SAT Math  
In statistics, M-estimators are a broad class of extremum estimators for which the objective function is a sample average. Both non-linear least squares and maximum likelihood estimation are special cases of M-estimators. The definition of M-estimators was motivated by robust statistics, which contributed new types of M-estimators.The statistical procedure of evaluating an M-estimator on a ...

Introduction to Applied Linear Algebra  
The method of least squares is a standard approach in regression analysis to approximate the solution of overdetermined systems (sets of equations in which there are more equations than unknowns) by minimizing the sum of the squares of the residuals made in the results of every single equation.. The most important application is in data fitting.The best fit in the least-squares sense minimizes ...
