Hardcover \$76.00 Only 6 left in stock (more on the way). Ships from and sold by Amazon.com.

Introduction To Gps The Global

Introduction to GPS Additional Links Introduction to GPS

The Global Positioning System (GPS) is a satellite-based navigation system that consists of 24 orbiting satellites, each of which makes two circuits around the Earth every 24 hours. These satellites transmit three bits of information – the satellite's number, its position in space, and the time the information is sent.

Introduction to Global Positioning Systems (GPS)

The Global Positioning System (GPS) is a location system based on a constellation of about 24 satellites orbiting the earth at altitudes of approximately 11,000 miles. GPS was developed by the United States Department of Defense (DOD), for its tremendous application as a military locating utility.

Introduction to GPS

Introduction to GPS: The Global Positioning System. If you're looking for an up-to-date, easy-to-understand treatment of the GPS (Global Positioning System), this one-of-a-kind resource offers you the knowledge you need for your work, without bogging you down with advanced mathematics.
