As well as using each of these functions individually to create a vector, the functions can be used in combination. For example, 

```
> value <- c(1,3,4,rep(3,4),seq(from=1,to=6,by=2)) > value [1] 1 3 4 3 3 3 1 3 5
```

 uses the rep and seq functions inside the concatenation function to create the vector value.
