The 7 Principles of Universal Design were developed in 1997 by a working group of architects, product designers, engineers and environmental design researchers, led by the late Ronald Mace in the North Carolina State University. The purpose of the Principles is to guide the design of environments, products and communications. According to the Center for Universal Design in NCSU, the Principles ...

Intuitive Design Eight Steps To

For that, Intuitive Design explores a framework based on the interaction sub-steps required to achieve the user's goal, which I call The Eight Steps to Intuitive UI. The steps are discoverability, affordance, comprehensibility, responsive feedback, predictability, efficiency, forgiveness, and explorability.
