These investments can help you profit from global warming ... Subtract the prior accounting period's profit from the current accounting period's profit. The result gives you the numerical change in profit. For example, if last quarter's profits were \$76,000 and this quarter's profits equal only \$72,000, subtract \$76,000 from \$72,000 to get -\$4,000, or a decrease of \$4,000.
