`/// <reference no-default-lib="true"/>` This directive marks a file as a default library. You will see this comment at the top of `lib.d.ts` and its different variants.. This directive instructs the compiler to not include the default library (i.e. `lib.d.ts`) in the compilation. The impact here is similar to passing `--noLib` on the command line.. Also note that when passing `--skipDefaultLibCheck`, the ...

The `FormData` object lets you compile a set of key/value pairs to send using `XMLHttpRequest`. It is primarily intended for use in sending form data, but can be used independently from forms in order to transmit keyed data. The transmitted data is in the same format that the form's `submit()` method would use to send the data if the form's encoding type were set to `multipart/form-data`.
