[Actually, this problem only tells
you half the story. It follows from
Antonelli's theorem that $z(p)$ is
both independent of the distribution
of endowments and behaves like a
single consumer's excess demand
system if and only if preferences
are identical and homothetic. See
Shafer and Sonnenschein (1982) for
a proof.]

Advanced Microeconomics Theory
Solution Jehle And Reny ...

1. Market equilibrium. Focus on prices and quantities, and on individual behavior as the foundation for models of interaction among economic agents. Single market ("partial") equilibrium and "general" equilibrium. Pure exchange model and Edgeworth box. Definition of equilibrium; the implicit role of time; price-taking behavior. Comparative statics and the Implicit Function Theorem. Existence of market equilibrium. 2. Economic Welfare.

University of Leipzig
Topics such as welfare economics, general equilibrium, game theory, and imperfect competition will be
