Jigs and Fixtures Objective  
Questions - Fitter (Set-1)  
A fixture is hold or clamp-  
ed to the machine table. It  
is usually heavy in  
construction. Jigs are used  
on drilling , reaming ,  
tapping and couter boring  
operations , while fixtures  
are used in connection with  
turning , milling , grinding  
, shaping , planning and  
boring operations.

This jig is designed to utilize the table saw fence to help locate these splines and make for repeatable cuts. As described in the video, this jig starts with the base that is designed to fit the intended table saw fence being used. It's important that this base doesn't fit too tightly on the fence or it won't slide easily.
