Jxta In A Nutshell - redditlater.com

JXTA (Juxtapose) is an open-source peer-to-peer protocol specification begun by Sun Microsystems in 2001. The JXTA protocols are defined as a set of XML messages which allow any device connected to a network to exchange messages and collaborate independently of the underlying network topology.. As JXTA is based upon a set of open XML protocols, it can be implemented in any modern computer ...
