Just-in-Time Production: The Path to Efficiency

Kanban serves as the control method that signals when it is time to pull raw materials or parts, in the right quantity or amounts. Kanban cards are used as the “go-signal” for upstream processes to work on the parts and make it available for the downstream processes. The Kanban system fundamentally facilitates the implementation of Just-in-Time.

Kanban Just-In-Time - Monografias.com

Just-In-time manufacturing, or JIT, is a management philosophy aimed at eliminating manufacturing wastes by producing only the right amount and combination of parts at the right place at the right time. This is based on the fact that wastes result from any activity that adds cost without adding value to the product, such as transferring of inventories from one place to another or even the mere act of storing them.
