Keep Up with Your Quants. Whether you work in financial services, consumer goods, travel and transportation, or industrial products, analytics are becoming a competitive necessity for your organization. But as the banking example shows, having big data—and even people who can manipulate it successfully—is not enough.

### **Keep Up with Your Quants - Harvard Business Review**

Then, the predicted number (on average) of squares out of 576 in which there are no bomb hits Likewise, other numbers in the column 3 can be easily obtained. The occurrence of clustering would have been reflected in the above table by an excess number of squares containing either a high number of flying bombs or none at all, with a deficiency in the intermediate classes.
