Source: King LT(S)-D: Manufacturers Instructions for Use Procedure 1) Assure an adequate BLS airway (if possible). 2) Select appropriately sized esophageal airway. 3) Test cuff inflation by injecting recommended amount of air for tube size into the cuffs. Remove all air from cuffs prior to insertion.

To Tube or Not to Tube? - American Heart Association | To ...

The King Airway is the subject of two recalls. One recall is for a manufacturing problem that resulted in the King LTS-D being too flexible and possibly folding over on itself in the airway. [1] I suspect that this could be handled by a modification of technique, but I have not had an opportunity to play with any of these faulty King Airways.. The other recall is for including Triad ...

The Laryngeal Mask Airway • Decreased time to insertion • Faster placement speeds • Significant “ first pass success ” • Overall success rates >82% in one study

HubbleMW,WilfongDA,BrownLH,HertelendyA,BennerRW.A meta-analysis of prehospital airway control techniques, part II: alternative airway devices and cricothyrotomy success rates.

Laryngeal Mask Airways (LMAs) | ACLS.com

The last three sentences of the first paragraph of the Suction-Based Airway Clearing Devices section don't make sense with a single study. I think you mean to say that the single study had a high risk of bias due to selective reporting (the number of episodes in which the device was used is not stated, and unknowable).

King LT-D use by urban basic life support first responders ...

Limitations to this pilot do not allow for specific comment on or validation of the efficacy of the King LT® as a first or second line airway tool. No digital end-tidal CO 2 monitoring was available; nearly all of the patients were critically ill or near dead and no patient follow-up was available for the few who survived to the ED.

Esophageal Airway (King LTS-D)

The development of the LMA has been hailed as one of the most significant advances in airway management since the endotracheal (ET) tube. 9 A great deal of literature exists that reports the successful use of the LMA as a primary airway device and as a conduit for intubation of the trachea. 6 SADs are now used in a wide variety of clinical indications and their versatility and ease of use make ...
