Arch Linux? Ubuntu? Which to use? Truly, there are very few or rare scenarios where one system would be better than the other, however, some might say that Ubuntu makes a great server-install just as well as a desktop or home system, due to its regular release cycle and LTS releases, whereas Arch makes a better home system than server, due to the nature of rolling release models with their ...

At this point the idea is to get the IE browser opened because the browser has "an issue" that we are going to exploit it. In case that your default browser is Firefox/Chrome/Opera/etc we should do some extra steps in order to open your IE browser because finally the IE is the one we are going to hack. If your browser is just IE then skip the steps below and go to the "IE browser opened".
