Water. Fresh water – as well as horse food, your horse needs access to fresh clean water as much as possible, but at least twice a day. If your horse doesn't have access to it, then make sure it does not have water immediately after a feed or it could land up with a blockage caused by undigested food moving too quickly through the digestive tract.

Know Your Donkeys Mules

In addition, donkeys have thin coats that don't offer a lot of protection in the winter. One study on hair samples from donkeys, horses and mules revealed that donkeys don't get a "winter coat" like their cousins do. They keep the same coat throughout the year, so when the cold winds start blowing, they shiver a lot more than other ...
