Lab report diffusion with  
gummy bears in sucrose  
solution This experiment is  
not osmosis. Osmosis is the  
transport of water molecules  
through a semipermeable  
membrane. There is no  
membrane in a gummy bear  
because there are no cells  
in there. This experiment  
was about collecting  
empirical results of a  
diffusion using gummy bears.

Measure and weigh nine Gummi (Gummy) Bears first. Use a data table to record your findings. Fill three glasses or cups with room temperature water. Leave the water plain in one cup, add a tablespoon of salt to a second cup, and a tablespoon of sugar to the third cup. Place three measured and weighed Gummi Bears into each cup. Wait 12 hours (or overnight) and measure and weigh the bears again. Put them back into the same cups.
