Thermo Fisher™ SampleManager LIMS™ software is the most widely deployed LIMS in the world for a reason – it's more than just a LIMS. Its lab execution and scientific data management capabilities make it three systems in one. SampleManager LIMS software is configured to model your business process guiding users step by step through your standard operating procedures (SOPs) and methods.

Informatics and the Clinical Laboratory

A laboratory information management system,

Download Ebook Laboratory Management Information Systems Current Requirements And Future Perspectives Advances In Healthcare Information Systems And Administration Book

sometimes referred to as a laboratory information system or laboratory management system, is a software-based solution with features that support a modern laboratory's operations. Key features include—but are not limited to—workflow and data tracking support, flexible architecture, and data exchange interfaces, which fully "support its use in regulated environments". The features and uses of a LIMS have evolved over the years from simple sample ...
